### **DETAILED ACTION**

# Specification

1. The disclosure is objected to because of the following informalities: On page 5, paragraph [0027], lines 3-4 and in paragraph [0028], line 1, "3" is objected to because it is the incorrect reference numeral used to describe the "secondary lift structure".

Therefore it is suggested to change "3" to - -5- -. On page 6, paragraph [0032], lines 3-4, "23" is objected to because it is the incorrect reference numeral used to describe the "secondary lift structure". Therefore it is suggested to change "23" to - -11- -.

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. Claim 2 recites the limitation "its piston end" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

# Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/750,655 Page 3

Art Unit: 3726

6. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Amesbichler et al. (5,778,517).

Amesbichler discloses an apparatus (7) for positioning a sunroof with a vehicle body (1). The apparatus comprises a base member (12) mounted to a running rail (2), the base member (8) movable along and vertically to the running rail; a floating plate (12) mounted to the base member, such that the floating plate is movable in longitudinal and transverse directions with respect to the base member (8), the floating plate (12) having a centering attachment unit (24) mounted thereon; a secondary lift structure (13, 14) mounted to the floating plate, the secondary lift structure including a sunroof attachment unit (13) and a primary lifting shaft (14); and a centering cylinder unit (47) disposed between the secondary lift structure (13, 14) and the floating plate (12), such that the centering cylinder unit (47) aligns the centering attachment unit (24) on the floating plate to a sunroof mounting position on the vehicle body. See column 4, line 45 – column 5, line 53, and figures 1-5 for further clarification.

# Allowable Subject Matter

- 7. Claims 1 and 3-5 are allowed.
- 8. The following is a statement of reasons for the indication of allowable subject matter: Regarding <u>claim 1</u>, the prior art does not teach or suggest a secondary lift guider and a secondary lift cylinder being interposed such that the secondary lift structure is liftable with respect to the floating plate, in combination with the other claimed limitations.

Application/Control Number: 10/750,655 Page 4

Art Unit: 3726

9. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

### Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the attached PTO-892 are cited to show devices for installing sunroofs.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jermie Cozart whose telephone number is 571-272-4528. The examiner can normally be reached on Monday-Thursday, 7:30 am 6:00 pm.
- 12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc Jimenez can be reached on 571-272-4530. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 13. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
